FIELD NOTES

OF THE

DEPENDENT RESURVEY

OF THE

NORTH BOUNDARY

AND

THE SUBDIVISIONAL LINES,

TOWNSHIP 49 NORTH, RANGE 74 WEST,

OF THE SIXTH PRINCIPAL MERIDIAN,

IN THE STATE OF WYOMING.

EXECUTED BY

JOEL T. EBNER

CADASTRAL SURVEYOR

Under Special Instructions dated MARCH 24, 1997, approved MARCH 28, 1997, which provided for the surveys included under Group Number 634, and assignment instructions dated MARCH 28, 1997.

Survey commenced JUNE 3, 1997

Survey completed OCTOBER 7, 1997

T. 49 N., R. 74 W., Sixth Principal Meridian, Wyoming

CHAINS

The following field notes are those of the dependent resurvey of the north boundary and the subdivisional lines, Township 49 North, Range 74 West, Sixth Principal Meridian, Wyoming.

The history of surveys pertaining to this resurvey are as follows:

Edward F. Stahle surveyed the Twelfth Standard Parallel North, through Range 74 West (south boundary) in 1881. E. A. LaPeire retraced the Twelfth Standard Parallel North in 1882. Louis F. Stahle surveyed the remaining exterior boundaries and the subdivisional lines in 1883. The standard cor. of Tps. 49 N., Rs. 73 and 74 W., was remonumented by Everett H. Kimmell and Herman Odessy in 1925, under joint coordination of the U.S. General Land Office and the U.S. Coast and Geodetic Survey. Jack A. Eaves dependently resurveyed the west boundary in 1958-59. Michael E. Whitmore dependently resurveyed the east boundary in 1991. Richard A. Kohler dependently resurveyed the south boundary in 1996.

Numerous local surveys and several subdivisions have been executed by private surveyors throughout the area.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1973, and the Special Instructions for Group No. 634, Wyoming, dated March 24, 1997.

Preliminary to the resurvey, the lines of the previous surveys were retraced and diligent search was made for all corners and other calls of the field note record. Identified corners were remonumented in their original positions; lost corners were reestablished and monumented at proportionate positions based on the latest official record, but only after exhausting every possibility of finding direct evidence of such corners. The retracement data was thoroughly verified and only true line field notes are given herein, which refer to the completed survey.

The survey was executed with a WILD model T1000 theodolite, WILD Model DI5S electronic distance meter and by chaining methods. The instruments were maintained in proper adjustment at all times. The directions of all lines refer to the true meridian, determined by hour angle observations of the sun at various points along the lines of survey and carried forward by sustained angulation.

T. 49 N., R. 74 W., Sixth Principal Meridian, Wyoming

CHAINS

Detectable Electronically Energized Particles (DEEP-1 TM) were buried as memorials at certain corner monuments. The "DEEP-1" is composed of strontium encased in a color coded plastic container. The units are 1 inch in diameter, $2\frac{1}{2}$ ins. long, weigh $2\frac{1}{2}$ ounces, and are magnetically detectable to an average depth of 8 feet.

The geographic position of the southeast corner of the township, based on NAD 27 and determined by Global Positioning System methods is:

Latitude 44° 10′ 18.59" N., Longitude 105° 41′ 31.36" W.

The mean magnetic declination is 12° E.

Dependent Resurvey of the North Boundary, T. 49 N., R. 74 W., Sixth Principal Meridian, Wyoming

(Restoring the survey executed by Louis F. Stahle in 1883)

Beginning at the cor. of Tps. 49 and 50 N., Rgs. 73 and 74 W., monumented with an iron post, $2\frac{1}{2}$ ins. diam., as described in the 1990-91 field notes of the dependent resurvey, T. 50 N., R. 73 W.

S. 89° 12′ W., bet. secs. 1 and 36.

Over rolling terrain.

40.315

Point for the 1/4 sec. cor. of secs. 1 and 36, at proportionate distance; there is no remaining evidence of the original cor.

Set an iron post, 28 ins. long, $2\frac{1}{2}$ ins. diam., 24 ins. in the ground, with brass cap mkd.

brass cap mkd.

An iron post, 28 ins. long, $2\frac{1}{2}$ ins. diam., set 24 ins. in the ground for a reference monument, bears N. $49\frac{1}{4}$ ° E., 122.3 lks. dist., with brass cap mkd. RM T49N R74W S13 80.7 FT. TO COR. 1997 and an arrow pointing to the cor.

An iron post, 28 ins. long, $2\frac{1}{2}$ ins. diam., set 24 ins. in the ground for a reference monument, bears S. $55\frac{1}{4}$ ° E., 100.8 lks. dist., with brass cap mkd. RM T49N R74W S24 66.5 FT. TO COR. 1997 and an arrow pointing to the cor.

The monument established in 1986 by Daniel A. Siek, Wyoming Registered Land Surveyor No. 2097, in harmony with this position, as filed in the Campbell County Clerk's Office, was searched for and not found, assumed to have been destroyed by road construction.

The witness cor. monument established in 1996 by Richard T. Doyle, Wyoming Registered Land Surveyor No. 2333, as filed in the Campbell County Clerk's Office, was searched for and not found. According to Mr. Doyle's corner record, his monumentation was destroyed by adjacent landowner. Mr. Doyle ignored the remaining evidence of the abandoned road extending W. and fence extending E., therefore his position is not accepted as a careful and faithful reestablishment of the original cor. position.

GENERAL DESCRIPTION

The area embraced by this survey is situated in the central portion of Campbell County, approximately 10 miles southwest of Gillette, Wyoming. The terrain varies from nearly level to rolling and broken, with the elevation ranging from about 4,500 feet to about 5,000 feet above sea level. The soil is primarily sandy loam. The vegetation consists of scattered sagebrush and native and domestic grasses.

Drainage of the area is provided by Wild Horse and Kingsbury Creeks which drain in a northerly direction, supplemented by numerous washes and draws. There are several large subdivisions in the township resulting in many occupied homes spread out through the central and north-central portion of the township. The remainder of the township is utilized in ranching operations. There has been extensive oil and gas exploration, resulting in many producing wells.

Access is provided by U.S. Interstate Highway No. 90, which traverses the township in an easterly and westerly direction. In addition there are several county roads and numerous subdivision roads which provide good access to the township.

CERTIFICATE OF SURVEY

I, Joel T. Ebner, Cadastral Surveyor, HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 24th day of March, 1997, I have dependently resurveyed the north boundary and the subdivisional lines, Township 49 North, Range 74 West, of the Sixth Principal Meridian, in the State of Wyoming, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said special instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in specific manner described in the foregoing field notes.

SEP 2 2 2000 (Date)

(Cadastral Surveyor)

CERTIFICATE OF APPROVAL

BUREAU OF LAND MANAGEMENT Cheyenne, Wyoming

The foregoing field notes of the dependent resurvey of the north boundary, and the subdivisional lines, Township 49 North, Range 74 West, Sixth Principal Meridian, Wyoming, executed by Joel T. Ebner, Cadastral Surveyor, having been critically examined and found correct, are hereby approved.

SEP 2 2 2000
